Herbal Hot Compress Massage

At Bualuang Spa, we use a heritage recipe to steam a combination of fresh Thai herbs encased in cotton and compressed directly onto your whole body. This focuses on specific areas that need to be healed. The Herbal Hot Compress helps relax tense muscles, soothe stiff joints and nerves, and increase blood circulation.

Herbal Hot Compress with Thai Massage

A traditional recipe of steamed fresh Thai herbs is encased in a cotton poultice and then used to compress directly on the whole body. While the Thai Massage helps you stretch and reduce body stiffness, the herbal heat penetrates and relaxes sore muscles deeply and increases blood circulation.

Organic Body Exfoliation

This spa treatment exfoliates dead skin cells by using spa cream produced from natural Thai fruits and vegetables, which is gently scrubbed on the whole body. You can choose from a selection of different scrubs that provide different benefits to your skin. This treatment is found to nourish, cleanse, and tone the skin; encourage its renewal process, improve blood circulation and reduce cellulite on your skin.

Organic Body Wrap

One of the main benefits of body wraps is their ability to hydrate the skin. Dehydrated skin can look dull and feel rough, but body wraps can help restore moisture and leave the skin feeling soft and smooth. The heat generated by the wrap encourages pores to open up so that the skin can absorb the moisture introduced by the body treatment.
